

DO ~~NOT~~ TRY THIS AT HOME

Issue #8

Featuring: **Marvin and Milo**

What you need: • a metal coat hanger
• two pieces of string • a fork

Watch me tune in to this coat hanger.

Tie a piece of string to each corner...

... and wrap the ends around your fingers.

Put your fingers in your ears and I'll tap the hanger.

Was it loud?

«dong»

It sounds louder because the vibrations travel through the metal and string more easily than through air.
